Pantano and Its Prospects-Bouson a Growing Town-A Lucky Prosproctor.

Special Correspondence of the Crizen.

Banson, February 12. EDITOR CITIZEN: You can hardly expect much of a letter from me today, but all the items which I think may interest you goes:

Pentano is 28 miles east from Tucson, and my lait is a cold place. There was ice on the water tank, and really it setuned as if all the cold winds from the Santaj Ritas, Davidson's monnboasts only two stores: Messrs. Tully, Ochoa & Co., Waxeheld & Davis dividing the honors. This will no doubt be an important place when the copper mines of the Santa Killas are worked in earnest. The copper belt is distant about lo miles in a straight line, but by the road it must be 19 miles. There is plenty of running water, which was placed in the hands Mr. Gervals, N. Sresovich, Jos. Sres water for five or six miles on the of Capt. A. W. Stone, of the San ovich, C. G. Gillett, Mr. Saunders, D. one smelter before long.

Benson, 18 miles further east from tance, owing to its being the railroad tion of the town is badly chosen, and to my idea it ought to be situated on and found a necessary to procure asthe San Pedro river, only one mile TORNEY and Counselor at Law, Office further east. As it is, all the water Sam Deal, chief of the ratirons deused has to be carried this distance. rendering the necessary element both scarce and expensive. The Southern Pacific Railroad, however, had the first choice, and now the town has arisen close around. Benson boasts of several good stores, plenty of saloons, many corrals, and the many other adjuncts of a town. Its population is about 250 souls, and the liberality of the citizens is evinced by the erection by subscription of a school

house costing \$300. The bulk of the trade is hence to Tombstone, and many are the teams employed. The rate of freight is from 50 to 65 cents per hundred, and I hear the roads are good.

There is a barley crushing mill here owned by Messrs Carr & Co., which started to-day for the first time. This firm expect to secure much of the teamsters' trade, owing to the very careful manner in which they clean their barley, and the moderate profit they intend charging on the manu-

districts: The Yellowstone District. 12 miles northeast from town, where about twenty miners are at work, and I hear the rock assays well and the prospects are encouraging. Then the Dragoon mountains, where several parties are working. From Summit Station some very rich rock has been brought to town. A few of the prospects have had shafts sunk on them to 40 feet, but outside of these few clauss little work has been done.

There are, I think, four lines of stages hence to Tombstone, and in opposition lines N. Smith, I think,

story I heard to-day: A miner ar that Goldwater was his prisoner. It stand. teamload of ore from Sonora. He had That mine goes." Yourstruly,
